

**Prepare yourself for
a pleasant surprise.**

**Shop a little smarter
and surprise yourself.™**

Molecule for molecule, LivingStone™ is identical to other leading brands of 100% acrylic solid surface.

But there is a difference. We work smarter. So you get a high-performance surface at a price other leading brands can't match.

Isn't that a nice surprise?

If you like Corian® Granola
you'll love our **Chestnut**

We do our homework so you don't have to.

We research the market to find the solid-surface colors that are best-sellers. And those are the only colors we manufacture and stock.

We call it the LivingStone™ **Smart Palette.**™

With only best-sellers to choose from, it's easy to choose a color with confidence.

If you like Staron® Aspen Brown
you'll love our **Sedona**

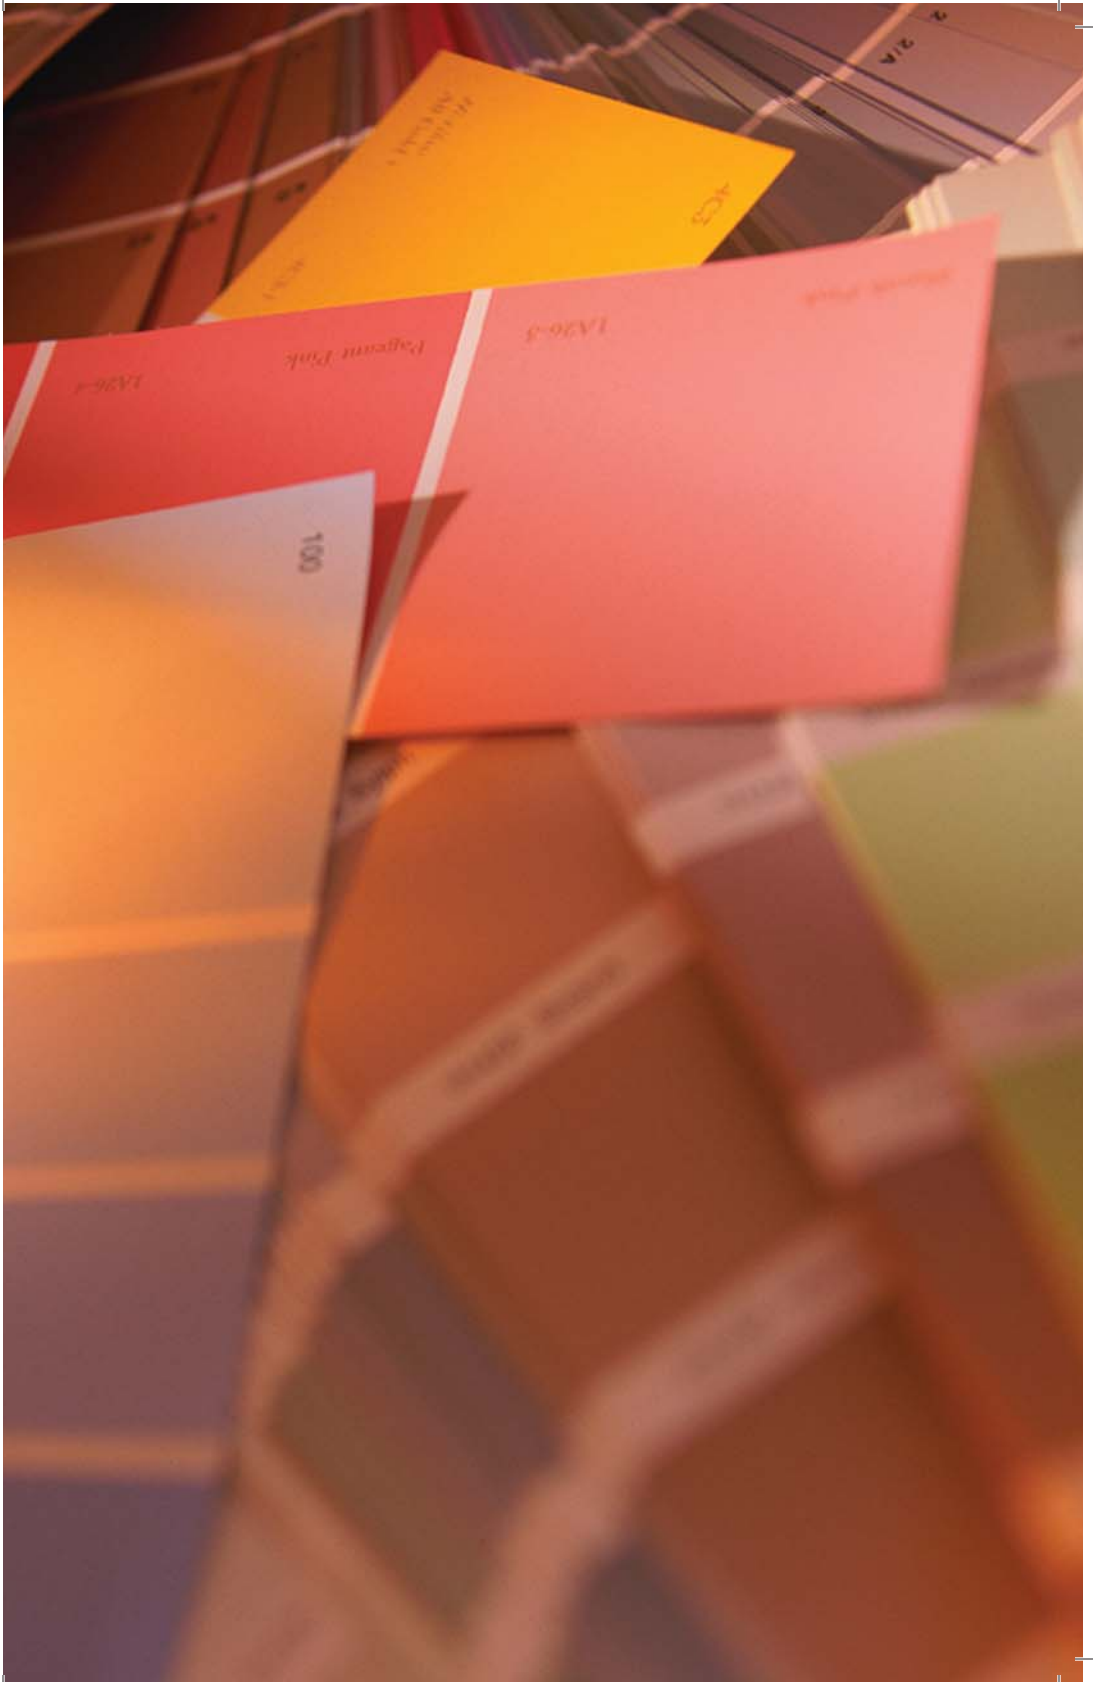

Take the stress out of choosing a color.

Every 100% acrylic color of LivingStone™ is a best-seller. So any color you choose from our **Smart Palette™** is sure to enhance the appeal and resale value of your property.

And odds are that your family, friends and future prospective buyers will love the color you choose as much as you do.

If you like Hi Macs® Tambora
you'll love our **Volcanic Ash**

High performance never goes out of style.

A countertop is the hub of a home. It's where the family and friends just naturally gather. So it makes sense to choose a surface that's easy on the eyes, feels warm and welcoming and is tough enough to handle the abuse of everyday living.

That's **LivingStone.**™ Made for living.
Hard as a rock.

If you like Corian® Mediterrean
you'll love our **Blue Lagoon**

Acrylic solid surface came to the market in the late 1960's, about the same time as muscle cars. And today each of them is an **American classic**.

Timeless style is one reason. But the real key to their appeal is their **legendary performance**.

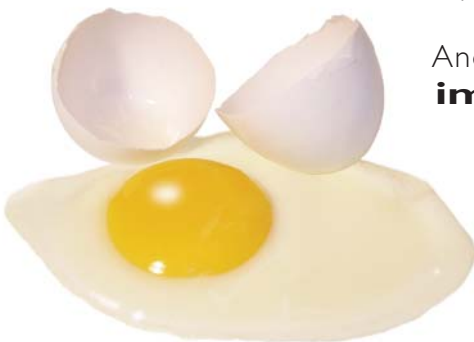

That's why acrylic solid surfaces have been **popular** since the first day

they hit the showrooms. People love the **virtually invisible, impervious seams**. They love the sleek, integrated solid-surface sinks that are **easy to clean**. And they love that LivingStone™ is nonporous, so **germs and odors can't penetrate**.

When you clean your LivingStone™ surfaces, they're really clean.

And LivingStone™ **resists impacts and stains**.

But if you do manage to damage it, keep your cool. LivingStone™ is **renewable** with surprising little fuss.

**LivingStone™ isn't cheaper.
But it costs less. Here's why.**

Even a Nobel-prize-winning chemist couldn't tell the difference between LivingStone™ and other quality brands of 100% acrylic solid surface.

Yet you don't have to be a rocket scientist to see why LivingStone™ is such a **surprising value**:

We bring it to market a lot more efficiently.

If you like Corian® Canyon
you'll love our **Arroyo**

**It costs us less to
make our product.**

It's not surprising. Our plant is one of the newest, most technologically advanced facilities in the world.

We only make colors that move.

We're more than happy to let our competitors make every color they can dream up. We prefer to make the colors research shows are best-sellers. Without dozens of slow-sellers to manufacture and inventory, our cost of doing business is lower.

We do business in a new way.

We're the only vertically integrated company in the solid-surface industry.

That means we not only manufacture LivingStone™ but we market it and distribute it, too. So no agents or middlemen tack on their costs.

Compare our prices with other leading brands. You're in for a **pleasant surprise.**

**The most surprising thing
about our warranty:
No surprises.**

Every inch of LivingStone™ is covered by a transferable limited 15-year product warranty.

No funny business. No fine print.

Our web site is full of surprises.

Mix countertop colors with sink colors and cabinet woods. Explore a range of sinks and edge treatments. And get all the answers you need when you *Ask Dr. Livingstone™*
